# 4K Forum 2015

## Advanced Visualization Technology Showcases

Los Angeles: August 24-28, 2015  
Detroit: September 21-25, 2015

Invitation Only - Please RSVP

### You are invited!

Mark your calendars For the IGI 4K Forum 2015! IGI invites you to attend a showcase of the latest 4K and advanced visualization technology available. Remember to RSVP!

Attendees will see examples of the latest technology used For Design and Manufacturing, Military Intel, Command & Control, and scientific visualization.

Systems on display include:

### IGI Laser 4K PowerWall

Featuring the brand new Barco DP4K-60L Laser 4K projector, attendees will see unsurpassed image quality and high spatial brightness from 6 primary color lasers (6P) generating up to 56,000 ANSI lumens. The Barco "Laser3D" precision, single projector optics ensure crisp, sharp, high, 2500:1 contrast 4K images on an innovative laser screen.

A radically improved (3D) experience: the first laser projector capable of showing 4K stereoscopic content using Infitec passive stereo glasses with zero cross-talk between eyes.

### Unprecedented Image Quality and Color

The Barco DP4K-60L represents the first commercially available 6P laser-illuminated projector in the U.S.

Dual laser RGB primary sets (6P) color allow users to see a broader color spectrum, you will see the world's best projected image. Superior image quality, exceptional brightness, increased contrast ratio and vivid colors assures an unparalleled level of detail.

### NVIDIA Quadro VCA

As the chosen integrator to bring the NVIDIA Quadro VCA to the design, manufacturing and engineering industries in North America, IGI will demonstrate the scalable, real-time photo-realistic rendering which delivers unprecedented performance.

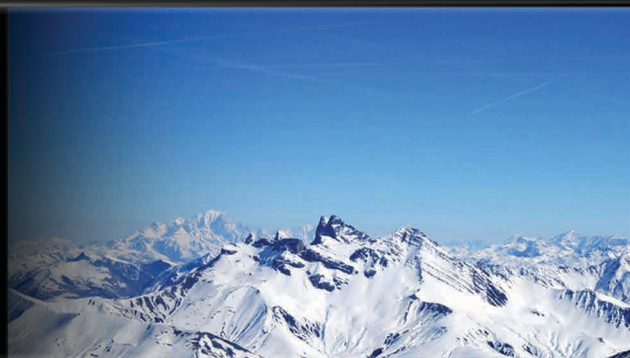

Witness design and VFX accelerated workflows - the fastest way to interactive photorealistic digital 3D models and scenes.

### IGI LED Powerwall

Featuring a new bezel-free HD LED 1.27mm pixel pitch display capable of native 1080P, 4K and customized resolutions with 16 bit grey scale, 3840 Hz refresh rate and 3000:1 contrast ratio!

Plan to attend the 7th annual IGI 4K Forum 2015 in Los Angeles or Detroit! Contact us to learn more:
