4K Forum 2014

Advanced Visualization Technology Showcases

Los Angeles: February 3-7, 2014
Detroit: February 24-28, 2014

Invitation Only - Please RSVP

You are invited!

Mark your calendars for IGI 4K Forum 2014! IGI invites you to attend their showcase of the latest 4K and advanced visualization technology available. Remember to RSVP!

Attendees will see examples of technology designed, installed and serviced by IGI across the nation used for Design and Manufacturing, Military Intel, Command & Control, and scientific visualization.

Systems on display include:

IGI PowerWall 4K

Featuring the Sony SRX-T615 4K digital projector displaying 4K images at 60 Hz with a 12,000:1 contrast ratio and 18,000 lumens of brightness powered by a media server and 3D models via RTT DeltaGen.

Featuring the Barco Galaxy 4K-23 three-chip DLP projector displaying 4K images at 120 Hz and 23,000 lumens of brightness, and Stereoscopic 3D capability powered by an IGI server with NVIDIA GPUs, running Autodesk VRED.

Immersive Virtual Reality

Featuring one wall of the innovative Barco Compact CAVE, see this breakthrough in immersive VR technology. Capable of working with any 3D application software, this compact VR system features a reduced installation footprint and very high quality.

Be one of the first to see this immersive solution in action powered by a IGI Server with NVIDIA GPU's, running Dassault Systemes CATIA with Live Rendering.

IGI Powerwall - LED

Preview the next generation of Large Scale Visualization using Direct View LED modules. With a pixel pitch of 1.9 mm, an array of modules can create any size PowerWall while maintaining 13.5 pixels per inch.

Other advantages include a 3" deep structure while generating an image several times brighter than projection based systems.

84" 4K LCD Panel

Featuring an 84" 4K LCD panel with advanced visualization software running at native resolution, this solution is well suited for use in multiple locations using an IGI Custom rolling cart solution.

Plan to attend the 6th annual IGI 4K Forum 2014 in Los Angeles or Detroit! Contact us to learn more:
