

Advanced Visualization

**GPU TECHNOLOGY  
CONFERENCE**

March 24-27, 2014 Booth 134 and 932  
San Jose Convention Center

## You are invited!

Attend a demonstration of advanced visualization systems at NVIDIA's GPU Technology Conference 2014! As a Platinum-level sponsor, IGI will showcase the latest 4K and advanced visualization technology available.

Attendees will see examples of technology designed, installed and serviced by IGI for use in Design and ManuFacturing, Military Intel, Command & Control, and Scientific Visualization.

IGI can be Found in Booth 134 in the Digital ManuFacturing Pavilion and also in Booth 932 right across From NVIDIA Grid during session and exhibition hours.

For more inFormation on GTC 2014 visit:

<http://www.gputechconf.com/>

Systems on display include:

## IGI Powerwall 4K

Located in the Digital ManuFacturing Pavilion where the networking center is located, see the IGI Powerwall 4K Featuring the Barco Galaxy 4K-32 (32,000 lumens) 3-chip DLP projector. The system will be displaying ultra-high 4K (4096x2160) resolution imagery.

Complex designs with real-time, photo-realistic ray-traced rendering using multiple NVIDIA GPUs.

## IGI Walkthrough

Be among the first to experience the brand new IGI Walkthrough consisting of three 84" 4K stereo panels with a mechanism that allows multiple configurations to achieve either a large presentation display at 180 degrees, a partially immersive display at 30 and 45 degrees, or a more immersive display at 90 degrees.

## Contact us today

We would be happy to reserve a private demonstration so you can witness these leading-edge solutions From IGI and make your critical decisions in context!

These state-of-the-art solutions are the culmination of our vast industry experience in designing, engineering and delivering technology that enhances our customer's critical decision making.
