IGI (Immersion Graphics Inc.)

“See what’s important” through large scale, ultra-high resolution visualization systems.

IGI designs, builds, installs and services large and complex visualization systems for forward-thinking customers like Purdue.

At the Purdue Envision Center, IGI supports a CAVE that is used for Clean Room and Nursing training through virtual reality simulation. The Purdue Virtual Reality Theater is reconfigurable and contains two adjustable outer walls to accommodate audiences of varying sizes. The floor and three upright screens all support Active Stereoscopic 3D projection. Closing the outer walls into a CAVE configuration enhances the immersion, allowing environments and data visualization to be experienced in new and engaging ways. This facilitates the discovery of unique and innovative perspectives.

IGI is known nationally for their state-of-the-art solutions which are the culmination of their vast industry experience in delivering leading-edge technologies and an unwavering commitment to reliability, quality and attentive service. Their systems

are ideally suited for high demand applications such as automotive engineering and design, military collaboration and intelligence, oil and gas exploration, command and control room, feature film post-production and more.

With the comprehensive IGI Extended Support Agreement, IGI's fully trained and certified service technicians ensure installed systems continue to operate as originally designed through regular maintenance checks and timely resolution of any issues that may arise.

IGI is based in Commerce, Michigan near Detroit with engineering and sales offices in Indianapolis and Los Angeles. For more information, visit werigi.com.

Testimonials:

"IGI provides the Envision Center with specialized equipment support and has been a reliable partner of ours for the past three years. Their expertise in visualization hardware and consistently excellent customer service has earned them a trusted relationship with us to the point where we recommend them to our clients. They have assisted us with new purchases, equipment upgrades, maintenance, troubleshooting and repair and have become a key resource for our continuing operations."

George Takahashi
